

WHY AM I FAT?

What Nobody Told You About Eating in the Modern Food System

Navigating the Industrial Food Carnival, One Bite at a Time.

By Carolyn Austin Price

Why does doing "pretty well" with food still feel like losing?

You're not alone. Most people don't struggle with food because they're lazy or aren't trying. They struggle because modern life makes the easy choice the default choice — and the easy choice is often the one that keeps you stuck.

Why Am I Fat? is a funny and refreshingly honest look at what's actually happening when good intentions meet real life. No shame. No 30-day challenges. No beige chicken.

Just a clear-eyed conversation about food, written for the person who's tired of being told to just be disciplined.

Why Am I Fat?

Inside, you'll find:

- Why hunger is biology, not a character flaw
- How calories, macros, and food labels really work
- A simple framework that fits real life
- What makes diets fail.
- A framework for real life, not a meal plan written by a monk.
- How to stop getting emotionally ambushed by a box of crackers.

"Nobody is truly lazy. Nobody is broken either."
